Subject: RE: R9 link for Gold King website

Hi all,

Thanks for sending this along – we should definitely have a link specifically for Navajo Nation communities in this vein.

This example is structured as a feed with paragraphs for each day, but I would like to know if we can include a chart that is stand alone and would be updated as needed, possibly multiple times each day (not under the day's header, but as a chart that we just update as we have new information about water locations). Also, can factsheets be added under this page? I'm happy to discuss my thoughts on the phone – I don't think a daily blurb like this is what is needed here for R9 updates.

Let me know if you are available to chat on the phone to discuss more.

Best,

Amanda

Hi Amanda:

There is a box on the site called "Information for Specific Communities". Seems like the right place for that. Currently there's only one there, for La Plata County, CO:
<http://www2.epa.gov/goldkingmine/la-plata-county-Colorado>

The capabilities I imagine would be similar to the above link. Adding Jeff Morin and Tim Davis who can answer your questions on full capability and can confirm that this is the best spot for these additional community updates.

Subject: R9 link for Gold King website

Hi all,

EPA Region 9 needs a place to give community updates specifically related to our efforts on the San Juan River and Navajo Nation. Please confirm with me that you all are able to create a link specifically for us, and that it will be easy to find on the overall website.

Also, let me know what type of capability the website will have. We would like to have a running list of water locations for livestock (and potentially crop water) that may be updated several times a day. We could do this by posting updated flyers each day, but might be better to have a formatted chart that can be added to as new locations come on line. That would be extremely helpful for us.

Other than that, we have a factsheet ready to post and can extract the text as a general update. We also have a number of contacts we'd like to add. Let me know what the best way forward is to get this up and running as soon as possible.

Best,

Amanda Pease
